

JOB DESCRIPTION

Working as a Resin Flooring Installer for Flowstone Industrial Flooring you will get involved in all elements of the installation of resin flooring systems, from floor preparation and remedial works, to the installation of all types of epoxy, polyurethane and MMA screeds, waterproofing and coating systems.

You must be able to work both within a team and under your own initiative, completing tasks safely, on time, and to the highest quality. All Flowstone operatives are expected to follow site rules and conduct themselves in accordance with company policies and procedures at all times. This includes undertaking drug and alcohol testing at clients' request. Flowstone operates UK wide so a willingness to travel and work away when required is essential.

TYPICAL ACTIVITIES

- Loading/unloading, maintenance and safeguarding of company equipment;
- Operation of handheld and mobile floor preparation equipment (e.g. scabblers, grinders, shotblaster, etc.);
- Mixing and application of resin products in accordance with manufacturer's guidance;
- Ensuring Health & Safety guidance complied with at all times including maintaining a clean and tidy work area and the correct PPE is worn at all times;
- Ensuring accurate records of daily activities recorded and job file paperwork completed;
- Maintaining effective communication with both the on-site and back office team.

Flowstone has been operating for over 20 years and is quickly expanding. As a result, we are currently seeking enquiries from both experienced applicators and those interested in trainee/labourer positions.

Our office is based in Ruthin, North Wales but the position is required for projects across the UK.

If you're interested in joining the Flowstone team call our office on 01978 790 186 or send a copy of your CV to info@flowstonefloors.com
